

ULTRA-CLASS BEARING UNITS

CAT.No. A-1400-V

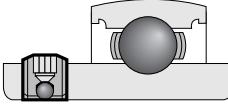

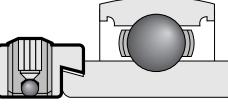

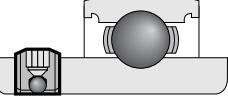

Ultra-Class Mounted Units

NTN's Ultra-Class is a feature rich high performance ball bearing mounted unit.

The same quality as NTN's world class electric motor ball bearings in a mounted unit.

Product Line Ultra-Class

Technical Data Ultra-Class

Bearing units are used in many industrial applications because they are:

1. Versatile—carry radial, axial, and combination loads
2. Easy to mount—slip fit with shaft
3. Simple design—complete with housing ready for mounting

APPLICATIONS SUITABLE FOR ULTRA-CLASS MOUNTED UNIT BEARINGS

ELECTRIC MOTOR QUALITY INSERT BEARINGS

One of the most important factors that determines the life of the bearing is the cleanliness of the steel. NTN uses high carbon through hardened steel purified using a vacuum degassing process with stringent quality control to achieve optimum hardness and micro structure.

NTN Ultra-Class bearings are consistently manufactured to tight tolerances for concentricity and roundness. When combined with the cage design, cage quality, and overall cleanliness, these bearings provide greater accuracy of shaft rotation, quiet operation, longer bearing life and contribute to higher speed capability.

NTN electric motor bearings are an example of bearings manufactured to such tight tolerances. The same attention to precision manufacturing of top quality electric motor bearings is extended to NTN insert bearings for mounted units. NTN has developed manufacturing equipment for in-house use that makes it possible to consistently select and control bearing tolerances that far exceed ABMA and ISO standards. Furthermore, this manufacturing equipment employs technology that insures this extremely high degree of tolerances; and dimensional consistency is maintained from lot to lot, on a day in and day out basis.

Ultra-Class inserts feature a black oxide coating to prevent corrosion and extend bearing life. Bearing surfaces coated with black oxide film include the inner ring, outer ring, flinger and set screws. The tough black oxide finish enhances corrosion resistance by creating a corrosion-resistant barrier to protect the steel surface from all types of corrosive environments.

Steel Cage

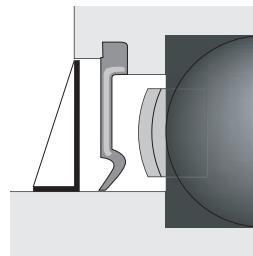

CAGE MATERIAL

NTN wide inner ring units use precision steel cages. The stamped steel cage makes them suitable for wide temperature range applications.

SEALS

Flinger / Seal

Ultra-Class inserts utilize a full contact molded rubber seal that is bonded to a steel backing plate. The seal lip rides on the inner ring which has been precision ground to provide a very smooth contacting surface.

Flinger Seal

The metal flinger that protects the seal lip is pressed onto the inner ring. There are triangular fins (protrusions) on the outside face of the flinger; these fins create an outward flow of air from the bearing as the bearing rotates. In this way, the flinger acts as a fan which keeps dust and water away from the bearing. The labyrinth effect between the flinger/seal combination is very effective in highly contaminated applications.

BALL POINT SET SCREW

The ball point set screw is an NTN exclusive design. The design features a hardened steel ball (HRC 62) that is retained in the end of the set screw. This set screw has several advantages over competitive set screw designs.

Difficult to work loose—Upon tightening, the steel ball is squeezed back into the tapered portion of the set screw, causing the threads to spread. This expansion of the threads makes it extremely difficult for the set screw to loosen when exposed to vibration and/or shock loads.

Develops larger holding force—the ball point set screw makes a point contact

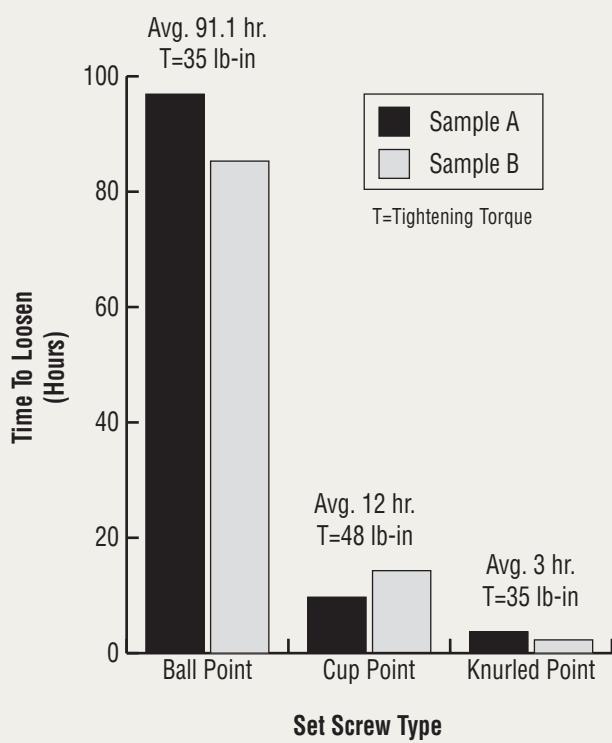

with the shaft allowing easy tightening and complete transmission of force to the shaft. The cup point and knurled cup point on the other hand make a circular contact with the shaft. In those designs, a portion of the tightening torque is used for cutting a circular groove on the shaft, effectively reducing the holding force.

Can be used repeatedly—The hardened steel ball does not deform when tightened. Additionally, it only leaves a small contact print on the shaft. The cup point set screw not only marks the shaft, but the screw itself becomes damaged, making it difficult to retighten if removed.

Needs no flat on the shaft—The ball point set screw makes a point contact and therefore does not require a flat on the shaft. The cup point set screw cannot make full contact unless there is a flat machined onto the shaft.

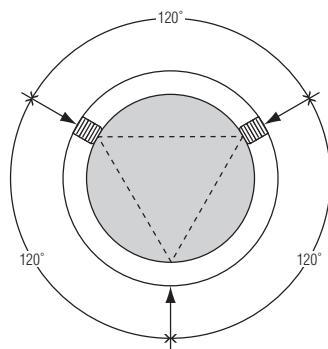

Reduced fretting corrosion at the tip of the set screw—Due to the hardened steel ball of the ball point set screw, fretting corrosion is considerably reduced. Cup point and knurled cup point set screws can cause substantially more fretting since they are generally not hardened.

TIME TO LOSEN TEST RESULTS

Set Screw Spacing

Units using the set screw locking method have the set screws spaced 120° apart. As the set screws are tightened to mount the bearing on the shaft, holding forces between the inner ring and shaft are created at three points. This develops higher holding force, more uniform mounting and less inner ring distortion. This results in quieter bearing operation and longer bearing life.

HOUSINGS

Heavy Duty With Solid Base

NTN mounted units have a solid base which dampens vibration by providing smooth and rigid mounting for the bearing. Stress in the feet of the pillow block due to bolt tension is also reduced and the chance of cracking is minimized.

Housings are made of high grade cast iron and designed to provide high rigidity and strength for heavy load applications. All housings are electrostatically painted using machinery gray powder paint. The electrostatic paint provides long term durability and resists rust and corrosion.

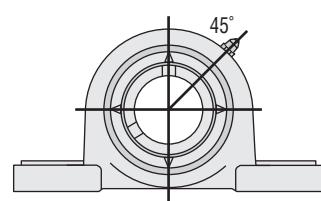

Housing deflections often create high stress in the bearing due to uneven load distribution and misalignment. NTN Ultra-Class housings are designed to provide rigid mounting for the bearing insert and minimize the effects of housing deflection.

Location of Grease Fitting

In NTN Ultra-Class pillow blocks the grease fitting is located at a 45° angle as standard. This makes re-greasing much easier in machinery located at high elevations or where the space is limited. The chances of accidental shearing of the grease fitting are also minimized.

Housing/Outer Ring Fit To Tighter Tolerances

The housing bore and outside diameter of the outer ring are manufactured to tight tolerances. This results in a precise fit between the two surfaces to provide proper insert bearing alignment inside the housing

making the unit more forgiving to misalignment. The housing/outer ring fit made to tighter tolerances eliminates the need for anti-rotation devices used by other manufacturers.

Metallic Name Plate

All NTN Ultra-Class units have a metallic name plate showing the complete part number for the unit. This name plate provides a permanent and durable part number identification for the unit which helps in finding the correct replacement bearing.

BASIC LOAD RATING AND LIFE

Basic Rated Life and Basic Dynamic Load Rating

The basic rated life is based on a 90% statistical model which is expressed as the total number of revolutions 90% of the bearings, in an identical group of bearings subjected to identical operating conditions, will attain or surpass before flaking due to material fatigue occurs. For bearings operating at fixed constant speeds, the basic rated life (90% reliability) is expressed as the total number of hours of operation.

The basic dynamic load rating is an expression of the load capacity of a bearing based on a constant load which the bearing can sustain for one million revolutions (the basic life rating). For radial bearings this rating applies to pure radial loads, and for thrust bearings it refers to pure axial loads. The basic dynamic load ratings given in the bearing tables of this catalog are for bearings constructed of NTN standard bearing materials, using standard manufacturing techniques. Please consult NTN for basic load ratings of bearings constructed of special materials or using special manufacturing techniques.

The relationship between the basic rated life, the basic dynamic load rating and the applied load is given in the following formula.

$$L_{10h} = \frac{10^6}{60 \cdot n} \left(\frac{C_r}{P_r} \right)^3$$

$$P_r = X \cdot F_r + Y \cdot F_a$$

L_{10h} : Basic rated life (hours)

F_r : Radial load (lbf)

C_r : Basic dynamic rating (lbf)

F_a : Axial load (lbf)

P_r : Equivalent radial load (lbf)

X : Radial factor

n : Rotational speed (rpm)

Y : Axial factor

Values of X and Y are shown in the following table. When only radial load is involved, or when $F_a / F_r \leq e$, the values of X and Y will be 1 and 0 respectively, resulting in the following equation.

$$P_r = F_r$$

VALUES OF X AND Y APPLYING WHEN $\frac{F_a}{F_r} > e$

$\frac{F_a}{C_{or}}$	e	$\frac{F_a}{F_r} > e$	
		X	Y
0.010	0.18	0.56	2.46
0.020	0.20	0.56	2.14
0.040	0.24	0.56	1.83
0.070	0.27	0.56	1.61
0.10	0.29	0.56	1.48
0.15	0.32	0.56	1.35
0.20	0.35	0.56	1.25
0.30	0.38	0.56	1.13
0.40	0.41	0.56	1.05
0.50	0.44	0.56	1.00

Note: C_{or} is the basic rated static load. When the value of $\frac{F_a}{C_{or}}$ or $\frac{F_a}{F_r}$ is not in conformity with those given in the table above, find the value by interpolation.

MOUNTING GUIDELINES

The following are general guidelines for shaft-mounting a bearing unit.

Set Screw

1. Make sure the support for the bearing unit is rigid and the surface where the unit is going to be mounted is clean and flat.
2. Make sure that the end of the set screw is not protruding into the bore of the bearing insert. Also, make sure that the end of the shaft is free of any burrs.
3. Insert the shaft into the bore of the bearing. (Fig. 1)
4. Do not strike the seal or subject the unit to any shock loads.
5. Mount the housing using bolts recommended in this catalog. (Fig. 2)
6. Insert a wrench securely into the hole of the set screw, and tighten the two screws uniformly (Fig. 3). Use the tightening torque specified in this catalog.

RECOMMENDED SET SCREW TORQUE FOR SET SCREW MOUNTING METHOD

Shaft size (inch)	Designation Of Set Screw	Tightening torques lbf-inch (max)
$1\frac{1}{2} - 1$	No. 10-32UNF	34
$1\frac{1}{16} - 1\frac{1}{4}$	$\frac{1}{4} - 28$ UNF	43
$1\frac{1}{4} - 1\frac{7}{16}$	$\frac{1}{4} - 28$ UNF	52
$1\frac{1}{2} - 2$	$\frac{5}{16} - 24$ UNF	69
$2 - 2\frac{3}{16}$	$\frac{5}{16} - 24$ UNF	86
$2\frac{1}{4} - 2\frac{7}{16}$	$\frac{3}{8} - 24$ UNF	147
$2\frac{1}{2} - 3$	$\frac{3}{8} - 24$ UNF	173
$3\frac{1}{16} - 3\frac{3}{16}$	$\frac{3}{8} - 24$ UNF	199
$3\frac{1}{4} - 3\frac{1}{2}$	$\frac{1}{2} - 20$ UNF	260

Eccentric Locking Collar

1. Make sure the support for the bearing unit is rigid and the surface where the unit is going to be mounted is clean and flat.
2. Make sure that the end of the set screw is not protruding into the bore of the collar. Also, make sure that the end of the shaft is free of any burrs. (Fig. 4)
3. Insert the shaft into the bore of the bearing. (Fig. 1)
4. Mount the housing of the unit using bolts recommended in this catalog. (Fig. 2)
5. Align the groove on the collar with the groove on the bearing inner ring.
6. Turn the collar by hand in the direction of shaft rotation. (Fig. 5)
7. To set the collar, insert a punch into the hole in the O.D. of the collar. Tap the punch so that the collar turns in the direction of shaft rotation. (Fig. 6)
8. Fasten the set screw of the eccentric collar onto the shaft. Use torque values provided in this catalog.

Fig. 1

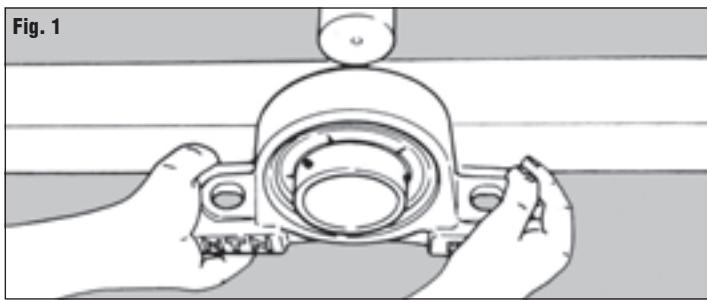

Fig. 2

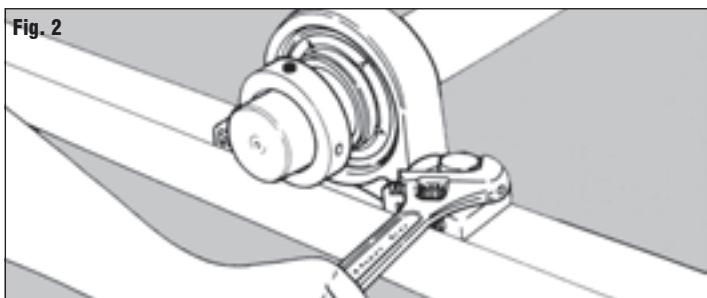

Fig. 3

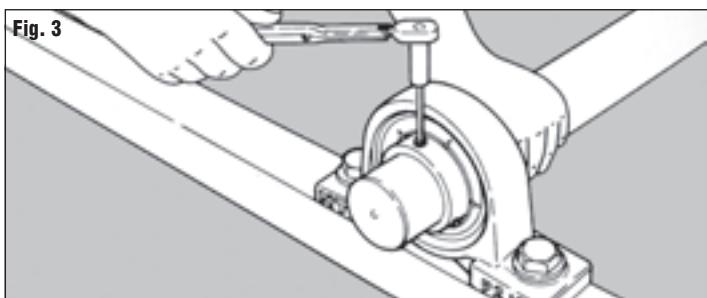

Fig. 4

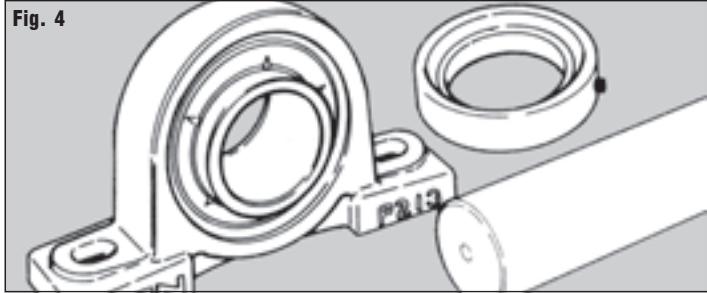

Fig. 5

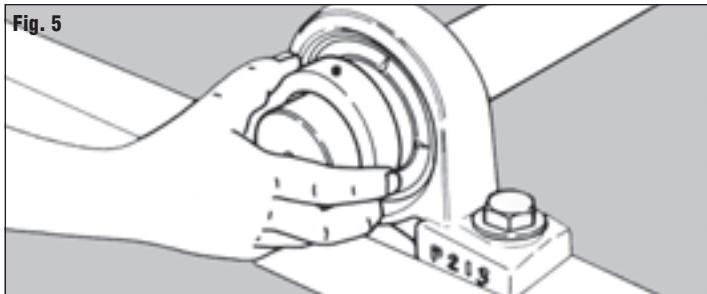

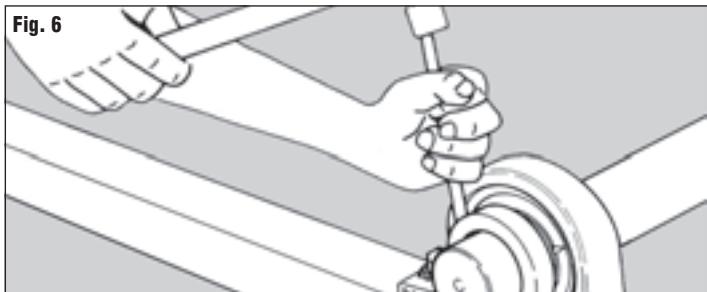

Fig. 6

RECOMMENDED SET SCREW TORQUE FOR ECCENTRIC LOCKING COLLAR

Shaft Size (inches)	Designation Of Set Screw	Tightening Torques lbf-inch (max)
1/2 - 1	1/4-28UNF	69
1 1/16 - 1 1/4S	5/16-24UNF	86
1 1/4 - 1 7/16	3/8-24UNF	104
1 1/2 - 2S	3/8-24UNF	138
2 - 2 3/16	3/8-24UNF	173
2 1/4 - 3	3/8-24UNF	260

SPEED RATING

Speed is governed by various factors including: size; seal type; and load. The maximum permissible speed can be found in the following table.

standard duty shaft size [in.]	medium duty shaft size [in.]	max. permissible speed [RPM]
1/2, 9/16, 5/8, 11/16		7800
3/4		6450
13/16, 7/8, 15/16, 1		5600
1 1/16, 1 1/8, 1 3/16, 1 1/4S	13/16, 7/8, 15/16, 1	4650
1 1/4, 1 5/16, 1 3/8, 1 7/16	1 1/16, 1 1/8, 1 3/16, 1 1/4	4000
1 1/2, 1 9/16	1 5/16, 1 3/8, 1 7/16	3550
1 5/8, 1 11/16, 1 3/4	1 1/2, 1 9/16	3300
1 13/16, 1 7/8, 1 15/16, 2S	1 5/8, 1 11/16, 1 3/4, 1 13/16	3050
2, 2 1/16, 2 1/8, 2 3/16	1 7/8, 1 15/16, 2	2750
2 1/4, 2 5/16, 2 3/8, 2 7/16	2 1/16, 2 1/8, 2 3/16, 2 1/4, 2 5/16	2450
2 1/2, 2 9/16	2 3/8	2300
2 5/8, 2 11/16, 2 3/4	2 7/16, 2 1/2, 2 9/16	2150
2 13/16, 2 7/8, 2 15/16, 3	2 5/8, 2 11/16, 2 3/4	2000
	2 13/16, 2 7/8, 2 15/16, 3	1900
	3 3/16	1750
	3 7/16, 3 1/2	1300

GREASE THICKENER COMPATIBILITY

When relubricating a bearing unit, it is essential to choose a clean lubricant compatible with the grease already in the bearing. Whether or not different kinds of grease may be mixed depends on the thickening agents used. Mixing different types of grease can affect key properties and affect the grease's performance. If these key properties are diminished, the grease can become ineffective, leading to premature bearing failure. Refer to the table below for grease thickener compatibility.

	Aluminum Complex	Barium	Calcium	Calcium 12-Hydroxy	Calcium Complex	Clay	Lithium	Lithium 12-Hydroxy	Lithium Complex	Polyurea
Aluminum Complex	●	■	■	●	■	■	■	■	●	■
Barium	■	●	■	●	■	■	■	■	■	■
Calcium	■	■	●	●	■	●	●	▲	●	■
Calcium 12-Hydroxy	●	●	●	●	▲	●	●	●	●	■
Calcium Complex	■	■	■	▲	●	■	■	■	●	●
Clay	■	■	●	●	■	●	■	■	■	■
Lithium	■	■	●	●	■	■	●	●	●	■

Lithium Complex	●	■	●	●	●	■	●	●	●	■
Polyurea	■	■	■	■	●	■	■	■	■	●

● mixing will not produce any appreciable change of properties

■ mixing may produce considerable variation of properties

▲ mixing will cause drastic variation of properties

STANDARD RELUBRICATION INTERVALS

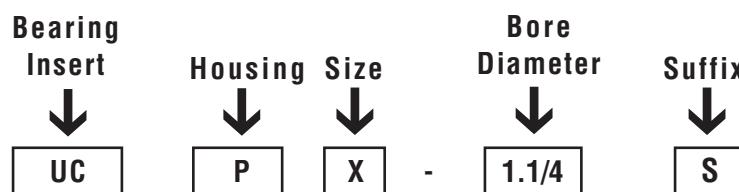

The standard grease chosen by NTN for ball bearing mounted units is Shell Alvania® S3. This is a lithium 12-hydroxy based product that maintains proper lubrication over a wide range of operating temperatures (-4°F to 275°F). NTN customers may specify different greases and/or grease fills, if desired.

The standard factory grease fill is 35% for most NTN inserts. This fill will accommodate most applications. For bearings known to rotate at high speeds, the grease fill should be reduced to prevent excessive heat generation.

dn Value [bore (mm) x speed (rpm)]	Environmental Conditions	Operating Temperature		Relubrication Interval	
		°C	°F	Hours	Period
40,000 and below	Ordinary	-15 to +80	+5 to +176	1,550 to 3,000	6 to 12 months
70,000 and below	Ordinary	-15 to +80	+5 to +176	1,000 to 2,000	3 to 6 months
70,000 and below	Ordinary	+80 to +100	+176 to +212	500 to 700	1 month
70,000 and below	Very Dusty	-15 to +100	+5 to +212	100 to 500	1 week to 1 month
70,000 and below	Exposed To Water Splashes	-15 to +100	+5 to +212	30 to 100	1 day to 1 week

Note: These relubrication intervals are general. Specific application conditions may require a variation from this table.

MOUNTED UNITS NUMBERING SYSTEM

1. BEARING INSERT

- UC: Wide inner ring, set screw type
- UEL: Wide inner ring, locking collar type

2. HOUSING

- FLU: Flanged unit, cast housing, 2 bolt
- FU: Flanged unit, cast housing, 4 bolt
- P: Pillow block, cast housing
- PL: Pillow block, cast housing, low center height

3. SIZE

- No code: Standard duty
- X: Medium duty

4. BORE DIAMETER

X.X/X: Shaft diameter in inches

5. SUFFIX

- S: Small housing
- R: Meets ISO dimensions

*Uses concentric locking collar.

Terms and Conditions of Sale

Offer; Acceptance. These terms and conditions (including the reverse, these "Terms"; and this agreement, this "Agreement") are deemed part of all quotations, acknowledgments, invoices, purchase orders and other documents, whether electronic or in writing, relating to the sale of goods and services (collectively, the "Goods") by Seller. If these Terms differ in any way from any purchase order, release or other document, whether electronic or in writing, from Buyer, these Terms shall be construed as a counteroffer and will not be effective as an acceptance of any thereof except on the express condition that Buyer assents to these Terms; provided that Buyer is deemed to have accepted these Terms upon the earlier of 10 days after receipt without objection and acceptance by Buyer of any Goods.

Warranties. (a) **Exclusive Warranty.** The exclusive Seller warranty is that the Goods are free from defects in materials and workmanship. This warranty is extended solely to Buyer and not to any successive buyers, users or other third parties. (b) **Limitations.** SELLER MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT THE MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE GOODS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE GOODS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. SELLER DISCLAIMS ALL OTHER EXPRESS WARRANTIES. (c) **Buyer Remedy.** The exclusive remedy of Buyer as to any Good is that Seller shall repair or replace (at Seller's option) the Good (with Buyer responsible for labor charges for removal or replacement thereof), such obligation being subject to the following: (i) the Good's application was approved by Seller; (ii) Buyer delivers the Good to Seller with transportation charges prepaid; and (iii) analysis by Seller verifies that the Good was properly handled, installed, maintained, lubricated and not subject to abuse, misuse or inappropriate modification.

Delivery; Packaging. (a) **Dates.** Delivery and shipment dates are estimated dates only. (b) **Partial Shipment; Etc.** Each partial shipment is deemed a separate contract for the delivered Goods. (c) **Shipment Terms.** All shipments are freight collect - FOB shipping point and Seller reserves the right to select transportation methods and routing. (d) **Packaging.** Seller will package Goods as it deems proper for protection against normal handling and extra charges apply to special conditions. (e) **Risk of Loss.** Risk of loss will pass to Buyer upon tender by Seller at the point of shipment defined as Seller's dock.

Pricing; Payment; Etc. (a) **Pricing.** Prices are subject to change without notice, and prices in effect on the shipping date will govern. Any increases in freight rates or transportation charges before shipment will be for Buyer's account. Prices also are subject to increase for any taxes, duties (including dumping duties) or other charges imposed on Seller by any governmental authority for the sale, delivery or use of the Goods. (b) **Payment.** Terms of payment (if any) are on the face hereof and apply from the invoice date. If Buyer fails to make any payment when due or Seller otherwise deems itself insecure, Seller reserves the right to change terms of payment and discontinue shipments; and Buyer agrees to pay Seller's customary late and interest charges for any failed or late payments.

Inspection; Etc. Buyer promptly shall inspect all delivered Goods. If Buyer does not inspect any Goods within five days of delivery, Buyer is deemed to have waived its right to inspect and to have accepted the Goods. Buyer must report to Seller shortages or defective Goods within ten days of receipt. Buyer may not return Goods without Seller's written consent, and if Buyer accepts any Goods, such acceptance shall be final and irrevocable.

Cancellation; Etc. Orders approved and accepted by Seller shall constitute firm commitments of Buyer and are not subject to cancellation or rescheduling. Orders for non-standard Goods not listed in Seller's catalogs may not be canceled at all, nor will Seller accept return of such Goods for credit.

Indemnities. Buyer shall indemnify and hold harmless Seller and its employees and representatives from and against all liabilities, losses, claims, actions, costs, expenses and disbursements (including attorney's fees and disbursements) related to any investigation, litigation or other proceeding (whether or not Seller is a party thereto) which arises or is alleged to arise from Buyer's acts or omissions under these Terms. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Seller and defend or settle any action brought against Seller to the extent that it is based on a claim that any Good made to Buyer specifications infringed intellectual property rights of another party.

Confidentiality; Inventions. (a) **Confidentiality.** All information and materials supplied by Seller to Buyer relating to the Goods are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and other wise use its best efforts to preserve the confidentiality thereof. (b) **Inventions; Etc.** If Seller or any of its affiliates makes a discovery or invention pertaining to any research, development or design work contemplated hereby, such discovery or invention shall be the sole property of Seller and licensing shall be at the sole discretion of Seller.

Force Majeure. Seller shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, year-2000 related computer malfunctions, delay in or lack of transportation or the requirements of any government authority.

Damage Limits; Etc. SELLER SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE GOODS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY. Further, in no event shall liability of Seller for any act exceed the individual price of the Good on which liability is asserted. Any action by Buyer must be commenced within one year after the sale of such Good by Seller.

Miscellaneous. (a) **Waiver.** No failure or delay by Seller in exercising any right and no course of dealing between Buyer and Seller shall operate as a waiver of rights by Seller. (b) **Assignment.** Buyer may not assign its rights hereunder without the Seller's written consent. (c) **Law.** This Agreement is governed by Illinois law (without regard to conflict of law principles). (d) **Amendment.** This Agreement constitutes the entire agreement between Buyer and Seller relating to the Goods, and no provision may be changed or waived unless in a writing signed by the parties. (e) **Severability.** If any provision hereof is rendered ineffective or invalid, such provision shall not invalidate any other provision. (f) **Setoff.** All claims hereunder by Seller are subject to setoff by Seller for any counterclaim arising out of any transaction with Buyer. (g) **Tooling; Etc.** All materials, equipment, facilities and special tooling Seller uses to manufacture Goods shall remain the property of Seller. (h) **Definitions.** As used herein, "including" means "including without limitation."
